

MATERIALIZING SUSTAINABILITY 2023

Shaping Emotions in Interiors

OUR HISTORY

OUR APPROACH

COMMON SENSE

A balance between product functionality and its impact.

FACT-BASED

Life-Cycle Assessment (LCA) to quantify the environmental footprint of our products. 3 key environmental indicators:

CARBON FOOTPRINT

The greenhouse gas emissions associated with the activities of an organisation. The main greenhouse gases are carbon dioxide (which is also the most abundant greenhouse gas) and methane.

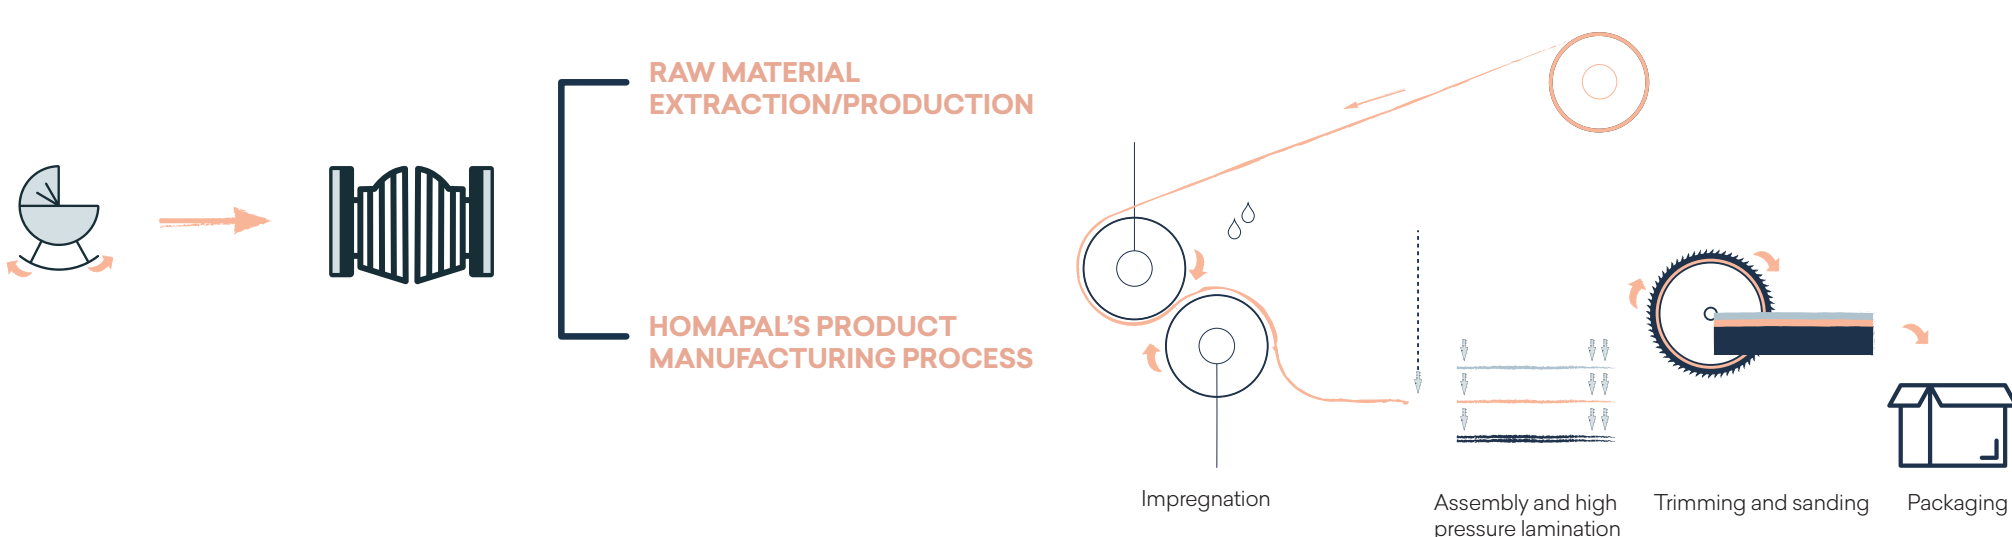

PRIMARY ENERGY DEMAND

The amount of energy that has been extracted from the natural environment for the activities of an organisation.

WATER FOOTPRINT

The impact of water used directly or indirectly for the activities of an organisation.

FROM CRADLE TO GATE

PAPER, A RENEWABLE RESOURCE, IS THE MAIN COMPONENT OF THE DECORATIVE METAL SURFACES.

THE CO2 SEQUESTERED BY PAPER (AS A WOOD PRODUCT) IS STORED IN OUR PRODUCTS FOR THEIR WHOLE LIFE-TIME.

THE KEY INDICATORS

CARBON FOOTPRINT

kgCO₂eq.

Carbon footprint impact includes the CO₂ storage of the wood fibres present in the inside of our panels.

Year 2019: 10,687,017
Year 2022: 8,652,970

-19%

PRIMARY ENERGY DEMAND

MJ

Year 2019: 229,329,629

Year 2022: 168,672,836

-26%

WATER FOOTPRINT

m³

Year 2019: 3,330,067

Year 2022: 2,039,152

-39%

REDUCING THE CARBON FOOTPRINT IS THE KEY PART OF OUR OVERALL SUSTAINABILITY VISION.

OUR TARGETS

OUR REDUCTION TARGETS FOR 2026 (BASELINE 2019) ARE:

CARBON EMISSIONS

-10%

HOW?

Energy efficiency + Sourcing of green power + Sourcing of more sustainable raw materials

PRIMARY ENERGY DEMAND

-5%

WATER FOOTPRINT

-180,000 m³

INCREASE EFFICIENCY

ENERGY

More energy-efficient equipment.

Optimisation of manufacturing system.

MATERIAL

Optimisation of materials and material waste.

REPLACE MOST IMPACTFUL ENERGY AND MATERIALS

ENERGY

Pursuit of opportunities to replace energy sources with renewable ones.

MATERIAL

Increase of the share of bio-based materials in our products.

MAKING REAL IMPACT FOR LESS IMPACT
