

HOMAPAL **AQUARIS SpaSystem**

... for a perfect bathroom feeling

Decor: Uni F7846 Grotto

FUNCTIONALITY AND AESTHETIC APPEAL IN THE BATHROOM

HOMAPAL AQUARIS means reducing everything to the essentials without compromising on functionality or aesthetic appeal. The innovative HOMAPAL AQUARIS board provides perfect looks and technical performance, particularly in spaces subject to high expectations. The variety of decors in the bathroom system opens up completely new options in respect of aesthetic appeal and brings life to the bathroom.

Seen from a functionality perspective, HOMAPAL AQUARIS is an all-rounder: despite low material thickness, the board is impact-resistant and unbreakable. Given to its hygienic and waterproof properties and a virtual absence of joints, it doesn't give mould a chance, making it predestined for use in wet areas.

Quickly installed without any significant drying and waiting times and the ability to bond it to existing substrate surfaces, bathrooms etc. can soon be returned to normal use. An all-inclusive installation set consisting of adhesive, an

attractively designed profile system and modern shower elements provides an all-round, no-worries solution for refurbishing, modernising or constructing new wet rooms. Ease of cleaning and low maintenance thanks to a virtually seamless

look as well as outstanding durability, light fastness and resistance to staining - all compelling aspects that leave no margin of doubt, particularly in areas used by the public because this ultimately saves time and money.

HOMAPAL has been finishing exclusive laminates and providing creative room concepts for decades. A wide range of products in a combination of colours caters to the wish for a consistent and perfectly balanced look.

Aesthetic aspects combined with our expertise as a system provider create optimum room solutions for planners, architects and fabricators alike.

ADVANTAGES

- ✓ Quick and easy installation
- ✓ Hardly any dirt or dust during installation
- ✓ Lightweight panel (approx. 2.7 kg/m²)
- ✓ Hygienic surface
- ✓ Almost no joints
- ✓ Colour consistent
- ✓ Lots of different decors for a tremendous variety of designs
- ✓ May be attached directly to the existing wall

INNOVATIVE BOARD FOR CREATIVE BATHROOM DESIGN

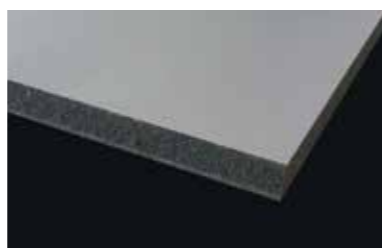

Substrate	closed cell PU Foam (0% moisture adsorption, d.h. 100% water-resistant)
Surface	High Pressure Laminate (HPL) according DIN EN 438-3
Dimensions	~ 3030 x 1280 mm ~ 2330 x 1280 mm (only for a few decors, compare page 11)
Thickness Element	~ 7,4 mm
Thickness Topcoat	0,7 - 1,2 mm
Balancer	Formica HPL 0,7 - 1,2 mm

WIDE RANGE OF DECORS FOR HAVENS OF WELL-BEING

Bathrooms not only serve practical aspects but, as places of retreat and relaxation, also cater to high expectations on aesthetic appeal. The wide variety of decors from HOMAPAL AQUARIS are guaranteed to make personal design wishes come true. Whether warm timber or classic-modern stone look, understated plain shades or explosions of colour, anything goes. The option of creating special motifs with a very personal feel turns the bathroom into a real eye-catcher

CLASSIC & MODERN

Classic elegance in the bathroom is more modern than ever before. The marble, wood, granite, quartz, concrete and metal decors from the TrueScale collection reflect contemporary design trends, with a return to natural-looking surfaces becoming increasingly apparent. The patterns from the Formica Group's TrueScale collection are not even repeated once across the entire width of the laminate panel, leaving the design to show its full beauty. Architects, designers and customers benefit from a surface solution that is more affordable and more hard-wearing than high-quality, natural materials, making it the perfect choice for use in commercial applications.

Endless individuality: motifs with an individual look, such as the range of pictorial decors from the HOMAPAL AQUARIS print collection - add highlights to all bathrooms. Endless scope for creativity. The combination of digital and plain decors from the HOMAPAL AQUARIS collection also brings calm and elegance to the bathroom and competently sets off the motif decors with stunning effect.

IMMACULATE BEAUTY IN THE BATHROOM

Formica INFINITI™ is both stylish and elegant and comes with a contemporary matt anti-fingerprint finish. This makes it feel velvety soft despite its hard-wearing quality. The processing technology used makes this surface more resistant to wear, finger marks as well as accidental scuffing, enabling it to retain a look of immaculate beauty for even longer.

” The variety of decors provides endless, aesthetically pleasing options for designing interiors. ”

SIMPLE & EASY INSTALLATION

- » Partial refurbishment possible
- » Large-format panels guarantee fast installation
- » Clean machining and installation
- » Using standard tools
- » Versatile & timeless
- » Can be applied to almost any surface
- » Much lighter than tiles (approx. 2.7 kg/m²)
- » Dimensionally stable material
- » Thin, dimensionally stable board adding hardly any thickness to the wall
- » Virtually no joints for greater hygiene
- » Tongue-and-groove connection (at the long sides)
- » Ideal both for refurbishment and new bathrooms

CLEANING

To clean the surfaces, we recommend using a soft cloth (e.g. microfibre) and mild detergents, such as washing-up liquid. It is strongly advised to avoid the use of highly alkaline and acid-based cleaning products, this also includes lime-scale remover. Rinsing with plain water improves the result of cleaning.

WALL FINISHING MADE EASY

The set of Homapal Aquaris accessories gives you all of the components you need for fast, easy installation - all coordinated to make installation as easy as possible. Whether directly on existing wall coverings, such as tiles, glued on stud walls or installed by rail system: HOMAPAL AQUARIS gives you the perfect solution for any taste and room situation.

HOMAPAL AQUARIS | Bonding System

The bonding system includes a wall adhesive based on silane-modified hybrid polymer (available in 600 ml bags) and a decorative transparent adhesive for sealing (available as an easy-to-use 290 ml cartridge). Despite providing an instant initial bond, the wall adhesive still leaves time to correct the board's position on the wall. The bonding adhesive is easy to apply, has excellent sealing properties and is permanently elastic.

To bond the HOMAPAL AQUARIS board direct to the wall, the receiving surface must be even, dry and provide a sufficient load-bearing capacity (see bonding instructions).

HOMAPAL AQUARIS | Tongue and groove

To make a tongue-and-groove connection, a groove is routed into both elements. These elements can be joined together to provide a positive-locking connection by means of a HPL tongue that is inserted in the two grooves. A virtually seamless finish gives the bathroom a consistent look.

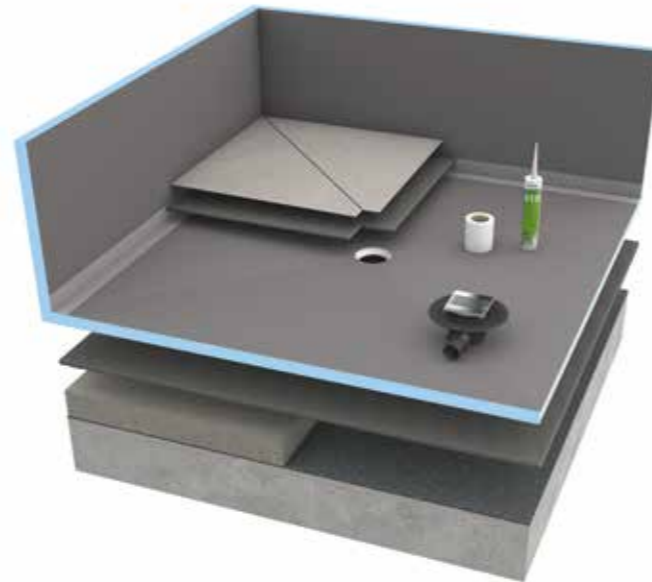

TONGUE:
Material: HPL
Thickness: 2 mm
Width: 20 mm
Length: 3000 mm

SHOWER ELEMENTS COLOURED TO MATCH THE WALL DECOR

HOMAPAL **AQUARIS** | Shower element

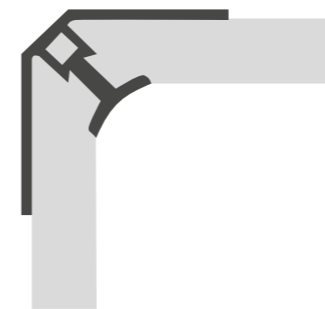

High-quality flush-to-floor shower elements from WEDI with point drainage complement the range of accessories for the HOMAPAL Aquaris Spa system. The element drains the shower water at the centre and the drain is covered by a stainless-steel trim. The incline required for this is already worked into the floor elements. The waterproof floor elements to be finished in the same decor as the bathroom board panels are not only hugely practical and reliable, they also open up entirely new design options for wet rooms and bathrooms – while guaranteeing easy and secure installation. Available in two formats (900 x 900 mm and 1200 x 900 mm) to suit your particular requirements.

- » The blue XPS core is 100% watertight, and remains fully functional even in the event of damage.
- » Joints between panels can be sealed watertight. As no further sealing is necessary, the fitter benefits from a high level of reliability and shorter laying time.
- » The fabric embedded in the cement surface provides a substrate for an incredibly strong bond.
- » All building panel systems are highly heat-insulating, save energy costs and offer lasting protection against mildew.
