NEW PERSPECTIVES - THE MODERNISED BAR AT CORDES & GRAEFE BREMEN KG

■ IMMERSE YOURSELF IN NEW WORLDS WITH REAL METAL SURFACES FROM HOMAPAL®

As an established specialist wholesaler for building technology, Cordes & Graefe Bremen KG is a key contact for many areas within this market segment. From sanitary, heating, and air conditioning equipment to electronics, installation and data and network technology, Cordes & Graefe Bremen KG is also one of the leading suppliers in the kitchen and roofing technology sectors.

The real metal surfaces from Homapal® GmbH were used in the company's in-house bar, utilising the light reflections from the metal surfaces to create lively and striking effects that immediately catch the eye. The bar and lounge are exclusively intended for corporate events and special occasions. As such, they hold a special status that is clearly reflected in the use of high-quality Homapal® surfaces.

■ ELEGANT CHARM THROUGH SHINY, TEXTURED SURFACES

The in-house bar of Cordes & Graefe Bremen KG had become somewhat dated, and the old office space next door offered room for creative design ideas. As a result, the bar and old office were completely gutted to make way for something new. The project idea was to redesign and upgrade the spaces for corporate events. The challenge was to incorporate all the conditions of the existing building into the project planning to prevent any issues during implementation. The project was carried out in collaboration with the company FSL Ladenbau.

Due to positive experience from previous projects, interior designer Ines Neimke-Daniels chose a real metal decor from Homapal® for this project as well. The 477/636 Alu-Mirror Gloss Lava Coppertone decor was used for the bar's counter cladding, the bar, and the newly designed lounge. This created a well-coordinated overall look that brought an elegant charm to the interiors with the shiny, textured surfaces. The indirect

lighting perfectly highlights the light-reflecting properties of the lava structure, creating a lively and extraordinary visual effect. The contrast between the light, shiny real metal decor and the dark counter surface, as well as the dark cladding of the back bar, makes the bar and lounge incredibly eye-catching.

Homapal® real metal HPL stands out for its ease of processing and its versatile design options, offering a wide array of textures and colours. The decorative real metal decors are ideally suited for creating unique surfaces in interior design.
